

ABSTRACT OF THE DISCLOSURE

A method for manufacturing a three-dimension ceramics structure includes the steps of immersing a three-dimension structural fabric into ceramics slurry, and baking the three-dimension structural fabric raised from the ceramics slurry at a predetermined temperature to eliminate organic components of the three-dimension structural fabric to thereby obtain the three-dimension ceramics structure.

1. A method for manufacturing a three-dimension ceramics structure, comprising the steps of:
immersing a three-dimension structural fabric into a ceramics slurry;
raising the three-dimension structural fabric from the ceramics slurry;
baking the raised three-dimension structural fabric at a predetermined temperature to eliminate organic components of the raised three-dimension structural fabric;
thereby obtaining a three-dimension ceramics structure.
